

Input board slot addendum Model 5180V/6180A

INTRODUCTION

This addendum details input channel locations for the case where input slots 1 to 4 are left empty for other wiring use. In such a case channels 1 to 6 are to be found in slot 5. If fitted, channels 7 to 12 are located in slot 6, channels 13 to 18 in slot 7 and channels 19 to 24 in slot 8. Figure 1, below, shows this graphically.

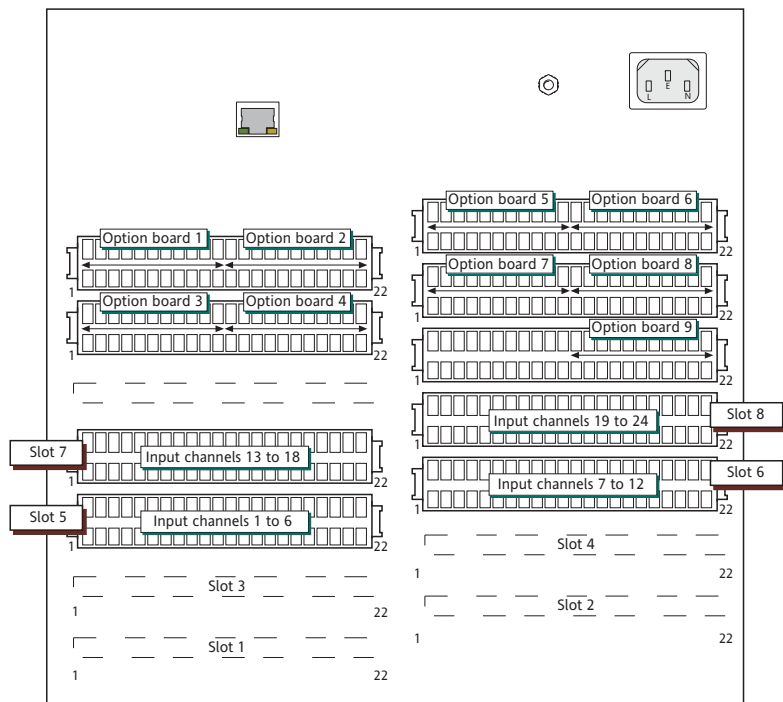

Figure 1 Connector locations
(6180A shown - 5180V similar)
